Our website uses cookies. On this page we explain what cookies are, how we use them and how you can manage them.

What are cookies and what we use them for?

Cookies are small text files that are stored on your device when you visit a website. The cookie means that the website can 'remember' you, and how you have used the site, when you come back.
Cookies are widely used in order to make websites work, or work more efficiently. Cookies themselves don't hold personal information, but they are unique to yo
We use cookies to make our website work as you'd expect and to tailor what you see on screen. They help us improve the speed and security of our site and allow you to share pages with social networks.

The types of cookies we use

Essential/Strictly necessary – Some cookies are essential to you being able to move around the website and use its features. They don't gather any information about you. This type of cookie only lasts for the duration of the time you visit the website – when you leave the website they are deleted.
Functional cookies – these improve your experience by doing things like remembering products you've added to your basket, or your search settings. These cookies stay on your computer until you choose to clear them.
Performance cookies for analysis – these are used analyse how our website works and how we might improve it. The information collected is anonymous.

How do I change my cookie settings?
Most web browsers allow some control of most cookies through the browser settings. To find out more about cookies, including how to see what cookies have been set,
visit: **aboutcookies.org** or **allaboutcookies.org**
To opt out of being tracked by Google Analytics across all websites, visit:
